Toxicology 86 (1994) 247–248

TOXICOLOGY

Volume Contents Volume 86

Publishers Announcement ..... *v–vi*

Genotoxicity of the phosphoramidate agent tabun (GA) **(Positive results were obtained only in 3 out of 5 assays and GA is therefore considered to be weakly mutagenic)**
B.W. Wilson, T.G. Kawakami, N. Cone, J.D. Henderson, L.S. Rosenblatt, M. Goldman, J.C. Dacre (Davis, CA; Fort Detrick, MD) 1–12

Cytotoxicity of dust constituents towards alveolar macrophages: interactions of heavy metal compounds **(An unselectively permutated mixture of metal ions shows no predictable but describable interactions in the effect on superoxide anion formation)**
R. Geertz, H. Gulyas, G. Gercken (Hamburg, Germany) 13–27

Protective effects of 2,3-dimercaptopropane-1-sulfonate on mercuric chloride-induced acute inhibition of enzymes from rat duodenal mucosa and kidney cortex **(DMPS may be useful in mitigating acute mercury poisoning)**
S. Suzuki, S. Takamura, K. Sugiki, M. Imai, O. Niwa, R. Tamatani (Ishikawa, Japan) 29–48

Immunologic and endocrine effects of the flame-retardant pentabromodiphenyl ether (DE-71) in C57BL/6J mice **(Subchronic exposure caused some modest immunotoxic response when measured as plaque-forming cell response to sheep erythrocytes, but did not affect natural killer cell activity)**
J.R. Fowles, A. Fairbrother, L. Baecher-Steppan, N.I. Kerkvliet (Corvallis, OR) 49–61

Reduced activity of tryptophan 2,3-dioxygenase in the liver of rats treated with chlorinated dibenzo-*p*-dioxins (CDDs): dose-responses and structure-activity relationship **(The metabolism of tryptophan may be related to the dioxin-induced inappetence)**
L.W.D. Weber, C.D. Palmer, K. Rozman (Neuherberg, Germany; Kansas City, KS) 63–69

Decreases in dopamine concentrations in adult, non-human primate brain persist following removal from polychlorinated biphenyls **(It is concluded that the continued dysfunctions are due to the initial insult rather than to continuing presence of PCSs in the brain)**
R.F. Seegal, B. Bush, K.O. Brosch (Albany, NY) 71–87

Arylation of sulfhydryl groups in vitro by the naturally occurring sesquiterpenoid benzoquinone, avarone **Arylation of sulfhydryl groups in vitro by the naturally occurring sesquiterpenoid benzoquinone, avarone)**
M.A. Belisario, R. Pecce, M. Maturo, S. De Rosa (Naples, Italy) 89–108

Induction of cytochrome P4504A by the peroxisome proliferator perfluoro-*n*-octanoic acid **(The compound increases not only peroxisomal enzymes but also cytochrome P450 A1)**
M.J. Diaz, E. Chinje, P. Kentish, B. Jarnot, M. George, G. Gibson (Guildford, UK; Dayton, OH) 109–122

Distribution of chlordecone to liver plasma membranes and recovery from hepatobiliary dysfunction in rats **(Chlordecone-induced hepatobiliary dysfunction manifests itself as reduced biliary phenolphthalein glucuronide excretion and reduced biliary mannitol clearance)**
L.G. Rochelle, L.R. Curtis (Corvallis, OR) 123–134

Effect of 3-phenylamino-L-alanine on tryptophan binding to rat hepatic nuclear envelopes **(It is possible that PAA or a breakdown compound becomes incorporated into proteins)**
H. Sidransky, E. Verney, J.W. Cosgrove, P.S. Latham (Washington, DC) 135–145

Dithiothreitol reversal of allyl alcohol cytotoxicity in isolated rat hepatocytes **(The very early events leading to cytotoxicity are reversible, even if glutathione is not restored to normal levels)**
L.E. Rikans, Y. Cai (Oklahoma City, OK) 147–161

Elsevier Scientific Publishers Ireland Ltd.
SSDI 0300-483X(94)02821-B

Publisher's Announcement ..... iii–iv

Characterization of the developmental toxicity of di-*n*-butyl phthalate in rats **(Treatment on days 13–15 at doses of 0.75 and 1.0 g/kg produced the highest number of fetuses with malformations)**
M. Ema, H. Amano, Y. Ogawa (Osaka, Japan) 163–174

Mechanism of mobilization of renal and hepatic cadmium by dithiocarbamates in mice **(Data on dithiocarbamate-induced Cd mobilization inthe presence of probenecid, acivicin, gamma-glutamyl-peptidase and ureter ligation)**
S. Kojima, T. Kamenosono, H. Shimada, T. Funakoshi (Kumamoto, Japan) 175–186

Immunotoxicology

Histopathology of the immune system as a tool to assess immunotoxicity **(A review is presented on the use and value of histological findings in preclinical immunotoxicity assessment)**
H.-J. Schuurman, C.F. Kuper, J.G. Vos (Basel, Switzerland; Zeist and Bilthoven, The Netherlands) 187–212

Fish as biomarkers in immunotoxicology **(A review is presented on current issues of immunotoxicity studies in fish)**
P.W. Wester, A.D. Vethaak, W.B. van Muiswinkel (Bilthoven, Haren and Wageningen, Netherlands) 213–232

Contents of Journals Relating to Toxicology 233–239
Subject Index 241–243
Author Index 245
Volume Contents 247–248
